Hello Mr. Moe,

Thank you again for your quick response.

While I agree that there are a few other opinions as to the need for a Northwest Corridor, and while I thank you for sharing your "pro-Loop" Rd opinion for the future as a professional planner openly, I am sorry that I must ask you the following questions again. These questions are for you regarding your meeting in **July** with Moises Gonzales and Steve Jerge, not the August 14th meeting you reference in your response.

I am all the more interested in the meeting that Moises Gonzales Sandoval County long range planner scheduled with you and Steve Jerge requesting the Town of Bernalillo to take the the lead on the Northeast Corridor aka Loop Rd as per Steve Jerge.

- * Who was in attendance outside of Moises Gonzales, Stephen Jerge, and yourself?**
- * Please provide any notes you took or any kind of record of this meeting.**
- * Please provide any written request for this meeting.**
- * Please provide any written response given to Moises Gonzales or Sandoval County.**
- * Please provide any correspondence or record or any communication with Sandoval County or any other governmental entity or subdivision regarding the Northeast corridor or Loop Rd.**

These I believe are legal Open Records requests and they have not been answered,. If you need to work through another person to provide this data, then by all means, please do, and work with this appropriate person where the questions relate to your own personal experiences at work, to answer and forward the responses to me.

Hope this clarification helps, and again, opinions are great
